## INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/EP2004/003335

**Box No. V** Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

## 1. Statement

Novelty (N)	Claims	1-8	YES
	Claims		NO
Inventive step (IS)	Claims	1-8	YES
	Claims		NO
Industrial applicability (IA)	Claims	1-8	YES
	Claims		NO

## 2. Citations and explanations (Rule 70.7)

1. The following documents were taken into consideration:

D1: WO 01/96314 A (BASF AG) 20 December 2001  
(2001-12-20)

D2: EP-A-0 251 083 (BASF AG) 7 January 1988  
(1988-01-07)

D3: WO 02/074753 A (RHEINHEIMER JOACHIM; BASF AG  
(DE); GEWEHR MARKUS (DE); LORENZ GISELA)  
26 September 2002 (2002-09-26)

2. The subject matter of the current application appears novel over the documents cited in the international search report. The claimed derivatives differ from the compounds disclosed in D1 by virtue of the R<sup>3</sup> group, from the compounds of formula (I) disclosed in D2 by virtue of the R<sup>2</sup> group, from the compounds disclosed in D3 by virtue of the R<sup>1</sup> substituents and can be considered a novel selection from the compounds of formula (VI) from D2.

Claims 1-8 therefore appear to meet the

Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
-----------	---

requirements of PCT Article 33(2).

3. The fungicides disclosed in documents D1 and D2 are the closest prior art.

The problem of interest can be considered that of developing further fungicides which are more effective than known compounds.

The applicant has shown the fungicidal effect of some of the claimed derivatives on pages 63 and 64, but a person skilled in the art would expect this effect given that the prior art compounds are structurally very similar. The applicant submitted details of comparative tests with the letter of 31 January 2005, in which a compound as per the application was selected which as well as being structurally very similar was also sterically very similar to the compounds claimed in D1. On the basis of that test data, which shows a surprising improvement in effectiveness, an inventive step can be acknowledged.

Claims 1-8 therefore appear to meet the requirements of PCT Article 33(3).

4. There are no objections under PCT Article 33(4) with respect to claims 1-8.
